COLE'S ILLUSTRATED CATALOGUE of Seed Specialties and Novelties.

VOL. XVII.

BUCKNER, MISSOURI.

1894-95.

Many claim that by mixing a few grains of store coffee with my Double Roast, combining their flavors, they obtain a more delicious and aromatic beverage than the imported article.

As my coffee cut does not show half the pods, for 30 cents I will prepare a bush in full bearing, containing an immense quantity of berries.

Coffee should not be used until thoroughly dry, as the older it gets the stronger and better it is. Harvesting begins when the beans fall off, and pods turn brown and begin to pop out, by cutting down at the ground with a hatchet and throwing over a barrel, or in this way, and will go as far in fattening hogs as twice as much corn. A small rain don't hurt them. I saved the farmers thousands of dollars last season by the use of my substitutes. This season expect to supply 20,000 more. I have received nothing but satisfactory orders, and hope from all over the Union, both North and South. Plant when you do corn, North or South.

Notwithstanding hundreds of my customers claim my substitute is equal to genuine coffee, some say better, I do not sell it as real coffee, but only a healthy and first-class substitute, which has strengthened and built me up more than several dollars worth of medicine, since I have been drinking it. An old German lady in my neighborhood used to use large lots of Coffee substitute, and said it was the old country coffee, and soda for raising beef, by fine, using one pint to the gallon of meal or flour. Also large quantities for fattening hogs, as it is 30 per cent rich in oil—the same as linseed seed.

Reports from the South demonstrate that two crops of Coffee Substitute can be raised on the same land, by planting first, crop early. Even here in my state, an excellent lot of crop range can be had by sowing the stubble over after early harvest, as it is not necessary for the seed to ripen fully before turning on hogs in the late fall.

I have the satisfaction of knowing that I have furnished 50,000 people with Coffee Substitute, thereby saving them thousands of dollars in their daily food, and of course they will supply many thousands more, as every person who sees it grow will want it. Price, postpaid, large packet, 20 cents; enough to plant 300 hills, 50 cents; 700 hills, $1.00; which produce enough for a king. (1 lb. postpaid $5.00, which plants nearly 12,000 hills.

My Large Catalogue will be ready November 50th. My Coffee Berry sells ten times larger than any other plant we have ever handled. A pound of Coffee Berries plants nearly 3,000 hills. Everybody wants Coffee. Stamps for small order, special prices for all orders over 10 pounds.

To Our Readers.

We call your attention to the card of C. E. Cole, of Buckner, Mo. He is advertising a bean, or substitute for coffee, rather which will become greatly into use, as every one will be enabled to raise this useful commodity in any climate for themselves at a very small cost. It is one of the most wonderful discoveries of the age, and will gladden the hearts of those who are unable to have the luxury as often as they would like it. We have tested it, and have never tasted anything which comes so near the genuine. You can procure some of the seed by writing to Mr. Cole at Buckner, Mo.

The above editorial is clipped from the St. Louis Mo., Christian Advocate, one among the oldest and most reliable religious papers in the Union, and read weekly by 100,000 Southern Methodists. Religious papers don't publish humbugs, neither do they advise their patrons to buy anything, unless they know it to be worthy.

C. E. COLE.
The California SweetWater Squash, similar in color to the Hubbard, keeps well through the winter and is a favorite in the South. It has a thin rind, and can be stored for months without losing its quality.

The Egyptian Prolific Vegetable Peach

Grows like a Muskmelon, bearing out in 60 days, and bears as many as 70 to 80 peaches to the tree. It is a prolific bearer and is valuable for all climates. It is a tree that bears heavy crops and is adaptable to all soils. It is a tree that bears heavy crops and is adaptable to all soils.

DOLLY VARDEN BEAN

Over 4,000 packets of Dolly Varden and Youghiogheny Favorite Beans were distributed to the people of the United States and Canada. The people have been impressed with the importance of protecting their crops and have purchased the new beans. The people have been impressed with the importance of protecting their crops and have purchased the new beans.

SOJA BEAN

Splendid for forage, easily and rapidly grown, the Soja Bean is well offered by our special recommendations of friends in South Carolina, who tell us that it is a favorite with the people of the South. It is a favorite with the people of the South.

THE EAGLE BEAN

This remarkable new variety for field culture is the most prolific bean known. It is, in one word, astonishing. It produces a large yield of beans, and is a favorite with the people of the South. It is a favorite with the people of the South.

THE ARROW BEAN

This is a new variety for field culture, and is most remarkable for its prolific bearing. It is a favorite with the people of the South. It is a favorite with the people of the South.

THE WILDFLOWER BEAN

A new variety for field culture, and is most remarkable for its prolific bearing. It is a favorite with the people of the South. It is a favorite with the people of the South.

The Extra Early Sweet Orange Blossom Bean.

Said to have originated in Florida; hence its name; being planted among orange trees and having the same sweet and delicate flavor. Very large, deep green, smooth, and compact, and as sweet as honey, and the largest yields known which makes it very popular. 60 cents a packet; half pint, 60 cents.

Very large. Makes delicious preserves and sweet pie, requiring very little sugar. Will keep perfectly fresh all winter. The housekeeper's delight and the poor man's friend. Half a dozen vines will supply a large family. On an average, 50 ears for each hill. Sown forty-eight days and some weighing over thirty pounds. They are also excellent hog food. It is sweeter and richer than the old kind. Hull them before planting.

For the Ladies.

The beautiful and golden delicious Japanese Pearl Corn.

I have found this to be a most remunerative grower, one plant filling a pole with a mass of very fine ears, densely loaded with handsome kernels. Do not claim too much when you say they are FULLY TWICE AS PRODUCTIVE as the old kind, for they are not so large; and the cabin is the one variety, but they are not so large and heavy.

New Banana Musk Melon—Cuban.

The sweetest and most delicious melon I have ever seen or tasted. It is a favorite in South Carolina, and is produced in large quantities. The seeds are very fine, and the fruit is a favorite for eating as a dessert melon.

The Colle Novelties.

Mr. C. E. Cole, of Backer, Mo., represents the Colle Novelties, and these are the most remarkable fruits in this season. Mr. Cole arrived yesterday, and, like a great many others, he brought with him a large quantity of melons and vegetables. He is a native of France, and has been in this country for five years.

A large, round, sweet and delicious melon, quite early. I know not whether it was from a pigeon's breast, but it is an excellent variety and continues bearing so long it might be called 'scarce.' The vines continue to send out rich shoots, and blooms till frost.

The Spanish Pearl.

A Spanish variety and one of the very best melons ever known in this country. A true Spanish melon, the size and shape of a large apple. Sown the 15th of May, and the melons were large enough to cut in pieces when the melons were ripe.

New Jerusalem Stock Corn.

It is a grand success and the only corn that has been reared on my farm in the dry plains of Kansas. Was brought here by a missionary from the Holy Land and is supposed to be the identical corn that Job and the patriarchs fed their flocks and cattle on. Drilled in rows, in spring, four feet apart, one plant every 15 inches, but produced from 60 to 90 bushels, besides an enormous quantity that was very delicious food. Mailed at 50 cents a pound.

The New Jersey Melon—SEMINOLE.

Of which this cot is a cut--that is to say, it is a seedling from the best variety of corn that I have ever seen. It is very productive, and the only corn that I have ever seen that will stand the test of the hottest weather. It is the most popular melon ever known in this country. It is a very handsome plant with large stalks, and will stand the test of extreme heat and drought. It is a grand success and the only corn that has been reared on my farm in the dry plains of Kansas. Was brought here by a missionary from the Holy Land and is supposed to be the identical corn that Job and the patriarchs fed their flocks and cattle on. Drilled in rows, in spring, four feet apart, one plant every 15 inches, but produced from 60 to 90 bushels, besides an enormous quantity that was very delicious food. Mailed at 50 cents a pound.

Champion White Pearl Dent Corn.

Very early, wide and deep grain, large early, white, firm and very heavy. Stalk good size, and nodal form. Has proven every way desirable. The U.S. Department of Agriculture down as No. 2 of the best varieties recently introduced.

Champion White Pearl Corn is matured in two weeks earlier than other varieties, with a fine yield.

Champion White Pearl Corn is a general favorite.

Champion White Pearl Corn is matured in three weeks earlier than other varieties, with a fine yield.

The Holy Land Butter Corn or Asiatic Golden Stalk Corn. Most valuable and wonderful, and truly the best maiz corn, so no hand has to shock or shell it. Large, soft ears, each corn cover ed with a long, with 24 to 30 inches; it will make both grain and fodder combined by cutting the ears up and feeding it to stock, which it does good day, but is a Yaf, as it is not staked, made of eight and six stakes as many ears from one corn, besides forming some grain heads from the tassel. Probably to all who have seen it, it is wonderful and valuable curiosity, making twice as much a blade fodder as other ears. Plant like other corn, one or two grains in a hill, according to strength of land. Postpaid, large ear 6 cents; small ear 4 cents; half the price of the Golden Stalk Corn. We are also going to be paid to strength of land. Postpaid, large ear 6 cents; small ear 4 cents; half the price of the Golden Stalk Corn. We are also going to be paid for the large amount of forage, green and cured, which the plant possesses all the season long. The plant possesses all the known advantages of the Russian Sunflower, and will be an excellent addition to the corn field. The plant possesses all the known advantages of the Russian Sunflower, and will be an excellent addition to the corn field. The plant possesses all the known advantages of the Russian Sunflower, and will be an excellent addition to the corn field. The plant possesses all the known advantages of the Russian Sunflower, and will be an excellent addition to the corn field. The plant possesses all the known advantages of the Russian Sunflower, and will be an excellent addition to the corn field.
New Pumpkin—King Of The Mammoth Golden Yellow.

This excellent new pumpkin originated in France. We are assured by reliable growers that with high culture it has been grown to more than 1000 pounds. It is a good reason why it should not grow as large or larger here. They are sweet, mealy, and of a bright golden yellow color, fine grained and of excellent quality, and in the unfavorable season planted in our own cold frame, will produce good stocks of pumpkins. From the size they cultivated they were in the tendering to the cows, they grew to an enormous size and furnished them a weight of 253 pounds. And candidate for good table quality, they are eaten green by stock and keep good and store well. They are easily grown by every farmer. Try them and you will be satisfied. 25 cents a large packet; pint 40 cents.

Last year, in consequence of the great demand from all sections for my Introducing Seed Buns, Farmer's Favorite, Polo Buns, Seminole Water Melon, For Melon, Calos Banana, Musk Melon, Flour Corn, Milo Maize and other corn, my supply gave out but this year I have enough for all. People have found out that these three are the only perfect corn for ensilage and stock feed, and besides produce three times more than any other corn. The stocks are sweet and eaten green by hogs and other stock, so you lose nothing. It is much richer than other feed, very healthy and not requiring half the seed to plant an acre. All of my 20 pounds of this packets this season will be twice as large as they were last year. I had 100 of these weighing 40 pounds, and Hansa Musk Melon weighing 15 pounds.

By planting a packet of Milo Maize, Flour Corn, Sunflower or Corn, turning it down and throwing stakes and all your hogs in as soon as the pods are ripe begin to turn, you can raise your ton or one-half the cost of your hogs. The Rice Corn is very frugal and comes in when you need it. I had 1000 bushels of corn last year, and in the warmest part of the South, I had 1000 bushels of corn this year. The missionary watermelon is a curiosity to behold and will be glad to receive a few reports of success from you. From the North and South a large starting packets, postpaid, 10 cents.

Some of my coffee customers are coming money by selling the seed to their neighbors for double the price paid for a sack, as everybody that tries it and sees it grow will have seed, regardless of cost.

ARTICLES.

NEW ROY BEANS.

Puskpari, large packet, 15 cents, quart 50 cents. This valuable bean is very early, and will prove to have a very large market. beams have proved to be extra good; every one of my Late COLE: Your Pop Corn is the best I ever saw.

Imperial German Perfection Tomato.

The Missionary Watermelon.

Brought to the country by a foreign missionary, and has proved to be one among the finest and most delicious melons known. Very fine sweet and sugary and a good shipper. Try it, it will suit all. 25 cents a large packet, 10 cents, half pint 40 cents.

POP CORN.

The largest, sweetest, and most delightful pop corn known. Immenstely productive, and pays well for chickens. Each grain pop out nearly as large as a history nut, early ears and grain large and makes an enormous quantity of tender, sweet stock feed. Plant a little thicker than other corn. Postpaid, 10 cents per ear. Producers 4 to 6 ears per hill.

Through the kindness of a German friend, I have secured the finest, largest, longest and most delicious corn I have ever seen, every ear now, direct from the Old Country: very forward and prolific seed. Postpaid, 5 cents a packet.

CABBAGE.

The New Short-Stem Drumhead Cabbage—of Late Drumhead.

In cultivation.
KAFFIR CORN.  
A NEW VARIETY OF SORGHUM CULTIVATED FOR BOTH FORAGE AND GRAIN.

This new grain was distributed in small quantity from the Georgia State Department of Agriculture. It has been preserved and fully developed and will make a paying crop on land that will not yield five bushels of corn or wheat. It is early as American Cane, and will mature its seed as far north as Minnesota and New York. It will make a fine crop of forage, if cut in early bloom, and the seeds that then follow will mature full crop of seeds and New York. It will make a

THE

ROYAL BENGAL MAMMOTH PRO-

FICIAL WONDERFUL PEA.

Of all the valuable peas I have ever seen this takes the lead for a general-purpose pea, either for the table, green or dry, for summer or winter use. As a stock pea or to plow under, it has no rival in size and yielder, resembling the Virginia Black Eye, but much larger, medium forward and adapted to all climates, and by making three plantings, you can have green peas six months. 

PACKET, 10 CENTS; QUART, 25 CENTS, POSTPAID.

REMARKS.

It is generally conceded that Missouri and Kansas are two of the richest and most desirable states for the growing of all kinds of seeds in the Union and all my seeds being grown in these states, under the very best conditions, and the very best business doubling itself every year, is full proof that my patrons are satisfied. It is always cheaper and safer to send money by getting an express money order, as 45, and under, costs only five cents, and can’t be lost. I am willing to plant the coffee as soon as the ground is warm, in the spring, and the vine peach will produce two crops per year in the South. Terms, cash on order. Order nothing but what is on my catalogue; and I can’t break your 65-cent boxes of seeds.
